I'm a passionate and driven Software Engineering student, currently specializing in Software Engineering. My journey has taken me through sales, admin, and education and now into the exciting world of innovation. I've worked with clients, managed teams, and now I'm building software solutions. I love solving problems, working with people, and creating systems that actually make a difference. I bring a strong mix of technical skills, real-world experience, and a hunger to keep learning and growing in the field.
